CAREER OBJECTIVE

I am a result-oriented individual with a strong academic foundation in Software Engineering, Web Development, Networking, and System Administration and Maintenance. My analytical and technical skills are well-developed, and I am eager to apply them to deliver impactful solutions within the IT industry. I am confident in my ability to contribute meaningfully while continuing to expand my knowledge and expertise.

PROFESSIONAL EXPERIENCE

PUBLICUS Asia INC., Ortigas, Pasig

March 2024 - July 2024

Web Developer Intern

- Rapidly acquired proficiency in PHP, MySQL and Security Measures to develop two full-stack government systems within four months.
- Collaborated with a team of 3 developers to design, develop, and deploy a portal and survey system.

Freelancer May 2024 - Present

Web Developer

- Developed three dynamic websites for clients in governments and education, demonstrating proficiency in strategic approach in problem solving and to work effectively and adapt in teamwork.
- Leveraged NodeJS, MongoDB, and ReactJS to develop user-friendly and responsive designs, consistently delivering projects on schedule and within budget.
